Art Unit: 1725

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Behrens and further in view of Rearwin, France 1,303,198 and Cook for the same reasons as set forth in the last office action.

Namely, Behrens shows to provide an inert gas inlet downstream of a molten metal inlet in an injection sleeve such that to introduce the inert gas prior to injecting the molten metal into the die cavity. Rearwin shows to provide a cleaning means for cleaning the metal stick to the piston during a die casting process such that to prevent the metal from scratching the sleeve. France '198 shows to provide a piston lubricating means to prolong the service life of the injection sleeve. Cook shows to provide a vacuum means (aspirating means) to facilitate the molten metal dispensing step in a die casting process. It would have been obvious to provide the die casting sleeve of Behrens with the piston cleaning means of Rearwin and the lubricating means of France '198 to prolong the service thereof. It would also have been obvious to provide the vacuum means (aspirating means) of Cook in the die casting apparatus of Behrens to facilitate the molten metal dispensing step in the die casting process.

3. Applicant's arguments filed Feb. 27, 2003 have been fully considered but they are not persuasive.

Applicant stated in the remarks that the cited prior art does not provide both surface lubricating and cleaning means for the piston. However, Rearwin and France '198, respectively shows to provide cleaning means and lubricating means for the piston such that to prolong the service life thereof. In view of the prior art teaching as a whole, it would have been obvious to provide both cleaning means and lubricating means in the piston of any prior art casting apparatus to prolong the service life thereof.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
